

Using the Five Senses to Assess Your Facility

Vector Art by Vecteezy! <http://www.Vecteezy.com>

Have a walk through!

- Assess the facility - look through the animals' eyes.
- Note what the animal sees, hears, smells and feels (tactile) while in that kennel
- Look at the environmental factors in each kennel space
- Look for stressors and triggers that affect behaviour
- Assessments need to take place to cover all periods of the day ie. morning, evening, weekend
- Map out your facility to chart areas as low, medium, high stress
